

## ASTRON A 11 Ready Mix -30°C blue, green, yellow

### Radiator antifreeze

#### Properties

**ASTRON A 11 Ready Mix -30°C** is an economical corrosion inhibitor and anti-freeze agent concentrate for radiators in water-cooled vehicles. The product is free of nitrite, amines and phosphates.

**ASTRON A 11 Ready Mix -30°C** provides excellent frost and corrosion protection all year round. The product does not have any negative effect on coolant hoses or cylinder head gaskets.

#### Use instructions

**ASTRON A 11 Ready Mix -30°C** is ready-to-use radiator antifreeze that can be used without any restrictions as a thermal transfer fluid in internal combustion engines made in cast iron, aluminium or a combination of these two metals, and radiator systems made in aluminium or copper alloys.

#### Observe manufacturer instructions!

\* meets the requirements of the OEM manufacturer.  
The stated values may vary within the usual commercial range.

17.06.2025

#### Specifications:

- ASTM D 3306
- SAE J 1034
- AS 2108-2004
- AFNOR NF R15-601
- BS 6580:2010

#### Recommendations\*:

- MB 325.2
- MAN 324 NF
- VW TL 774 C
- MTU
- BMW
- Opel-GM
- Deutz/MWM
- Ford/Jaguar
